Autolog LITE – the Mileage Logbook for the Employee

The easy and simple solution when keeping track of business miles

Autolog LITE is a simple solution when you need to keep track of the miles you drive in the line of business. Autolog LITE is delivered ready to use and for less than 20 p. per day you get the most efficient system on the market for keeping track of your mileage.

Insert the installation CD which comes with the package and the program will automatically install itself. Place the Autolog device behind the windscreen (or some other suitable place). It will be activated automatically by means of a vibration sensor – or it may be done manually.

When you want to compile your mileage report, connect the device to the computer by means of the accompanying USB cable. All data about your driving are automatically transferred to the computer and your log will be ready in a couple of minutes. It doesn't come much easier! Or faster!

When time is money

Only few people contemplate how much time they spend on compiling a mileage report. Facts are, that most people use more than two and a half hours a month!

With Autolog these hours may be saved for other tasks. Compared to an average hourly wage there can be no doubt that Autolog is good value for you money!

Calculation demonstrating how fast the savings with Autolog LITE plus a license for one year will accumulate. The assumptions used are: User saves 2.5 hours per month and has an hourly salary of 15.2 £.

Autolog has been developed according to the requirements for mileage reimbursement set by Inland Revenue. Autolog gives you a reliable documentation towards I.R.

With Autolog LITE the license for the first three months is free. After the free period the license costs 50.5 £ per year. (VAT excl.) The total cost of Autolog LITE for the first year amounts to 160 £ (+VAT).
