Microsoft Dynamics C5 Light for Autolog PRO

Registration of business travel and accounting – two time consuming activities...

Microsoft Dynamics C5 Light for Autolog PRO renders a unique integration between Autolog's automatic travel log system and Microsoft's prizewinning accounting system. Microsoft Dynamics C5 is the most commonly used economy system with over 70.000 licenses installed in Denmark.

C5 Light has been developed with focus on businesses that have a limited need for an administrative system. C5 Light focuses on consumer friendliness, consisting of selected basic functions that are sufficient for most smaller businesses. Further modules can always be purchased as the need for further functions arise.

The advantages of Microsoft Dynamics C5 Light are:

- An extendable system which may be tailored to your immediate needs as the company grows.
- The system supports the complete Microsoft Office package.
- The system is well known by accountants and auditors. This facilitates the cooperation when making the annual financial report and settling VAT payments with IR.
- The system is simple and simple to work with.
- New employees may already be familiar with the system.
- **Autolog PRO** is a comprehensive electronic driver's log designed for businesses and individuals that have a need for a detailed record of both business and private travelling. The PRO-version comes with the installation CD ready for use and for less than 20p. per day, the system offers a unique system that fulfils all documentation requirements of the IR.

When the travel report is made the Autolog system automatically combines the driving with the name of a customer procured from the C5 customers/contacts file. This forms a travelling entry which will always have the relevant customer/contact attached.

The integration between Autolog PRO and C5 has been developed in cooperation with DSI DATA a/s. DSI Data is a specialist in the field and is one of Microsoft's six specially selected service partners..

Microsoft Dynamics C5 Light for Autolog PRO is available as a comprehensive package containing a C5 Light license, an Autolog PRO including the logging device and the necessary software. The components may be purchased individually including the Autolog/C5 connecting software in case you already own one or the other of the components.
