# Autolog PRO – for the more comprehensive registration

## Do you need more than a mileage logbook?

**Autolog PRO** is a mileage logbook with extended functions developed for businesses and individuals with a demand for a detailed registration of both private and business miles. The PRO version is delivered with an installation CD ready for use and for less than 20p. per day Autolog PRO offer a unique system which fulfils all requirements of documentation of a mileage logbook from Inland Revenue!

The system easily distinguishes between business and private driving for each individual log.

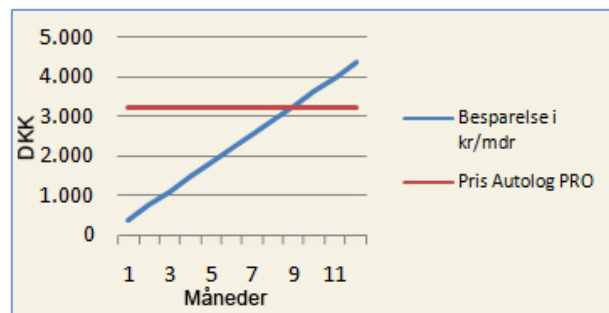

### How much time is spent on the registration of business mileage?

Many companies need to register both driven miles and time spent. This is time consuming, and that time might be spent on more pressing tasks. With Autolog PRO you get a driver's log, a time sheet and an activities record all in the same program.

### Visualize your routes and the location of your customers.

Autolog PRO is integrated with GoogleEarth which opens the opportunity of getting a geographic overview of the location of your customers. You may also visualize the routes you have driven. This gives you an excellent documentation for the miles driven in case of an I.R. audit.

With Autolog PRO the hours may be saved for more productive tasks. Compared with an average hourly wage there can be no doubt that Autolog delivers good value for your money.

Calculation demonstrating how fast the savings with Autolog PRO plus a license for one year will accumulate. The assumptions used are: User saves 2.5 hours per month and has an hourly salary of 15.2 £.

With Autolog PRO the license for the first three months is free. After the free period the license costs 50.5 £ per year.(VAT excl.) The total cost of Autolog PRO for the first year amounts to 291 £ (+VAT).
